

800X3200 mm / 15 mm

2023 COLLECTION
CATALOGUE

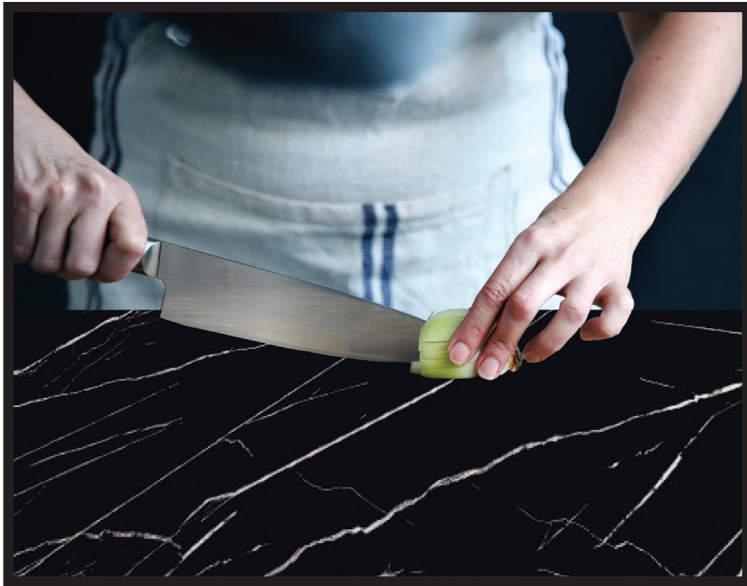

USAGE AREAS

Although the areas of use are listed as kitchen counter, fireplace, floor, exterior, stairs, tv unit and furniture, they can also be used by architects with strong design power to serve different purposes in a wide variety of spaces by pushing the limits of their creativity. For every living space to be reimagined with Estestone elegance, you can get the inspiration you need from the stone's own character.

STAIN RESISTANT

Estestone slabs have very low porosity, liquids and chemicals like bleach, hydrochloric acid and other cleaning agents do not penetrate the surface.

HEAT RESISTANT

Estestone has successfully completed technical tests in this field, which has been prepared to maintain their properties in case of heat contact. You can use it safely in fireplaces and other living areas where contact with the heat is possible, primarily kitchen counters. In addition, it is recommended to place final or heat pads under hot kitchen supplies to minimize heat contact to extend the service life.

ANTIBACTERIAL & SCRATCH-PROFF

In the use of Estestone in different areas, this stability, which is provided as a result of long-term R&D and technical tests, provides full protection against dirt and stains that may occur in our porcelains due to various external factors. Thanks to its special texture, we value your health as much as you do thanks to its dust and stain-free feature and antibacterial formation.

Estestone, which has a strong and durable structure due to their non-porous nature, are resistant to scratching in contact with sharp surfaces. For this reason, they can be used safely in areas where it is possible to interact with sharp materials. It is recommended to use cutting boards on kitchen countertops in order to keep their technical characteristics stable in the long term.
